SUMMARY

I am an enthusiastic and curious learner currently pursuing a degree in CSE(Artificial Intelligence and Machine Learning) at MRCET. I'm passionate about building smart, efficient solutions using AI technologies and exploring the frontiers of innovation in programming and development.

EDUCATION

Bachelor of Technology in Computer Science & Engineering, MRCET

2023 — Present
Hyderabad, India

- Currently I am a 4th year Computer Science Undergrad Student who is looking for opportunities

EXPERIENCE

AI Intern

Aug '25 — Oct '25

Infosys Springboard

Remote

Developed an **AI-enabled stock market forecasting model**, applying ML algorithms and time-series analysis to predict stock trends.

- Integrated **yfinance API for real-time and historical market data**, and built end-to-end data pipelines for processing, visualization, and prediction.
- Implemented intelligent features using **Gemini AI**, enhancing analytical insights and user interaction.
- Strengthened skills in **machine learning, full-stack development, and API integration**, while managing internship tasks alongside academic coursework.

CERTIFICATES

Cambridge English C1 level Certification, Cambridge University Press & Assessment

Mar '24

Google Clouds GenAI Exchange Program's, Hack2skill

May '25

Principles of Generative AI Certification, Infosys Springboard

Jun '25

Artificial Intelligence Primer Certification, Infosys Springboard

Jun '25

AWS-GENERATIVE AI FOUNDATIONS, AWS

Nov '25

ACHIEVEMENTS

Infosys Springboard Virtual Internship 6.0

Jul '25

Ranked in the Top 10

NetElixir's Aignition Hackathon

Jul '25

College level finalist

Smart India Hackathon

Dec '24

PROJECTS

Stock Trend Analysis Using AI [Link](#)

Present

- Built an AI-powered stock trend prediction system** using Linear Regression, Random Forest, and ARIMA models.
- Developed interactive visual dashboards** with charts and a clean UI for forecasting stock movements.
- Implemented modular data-processing and model pipelines**, enabling easy updates and extension for multiple stocks.

Landing Page Generator [Link](#)

- Designing and building a dynamic landing page generator that recommends personalized content to users using a cold start strategy.
- Leveraging behavioral data such as engagement levels (frequent viewers, repeated purchasers) alongside demographic factors (age groups, gender, income brackets) to tailor landing page layouts and recommendations.
- Analyzing user source (paid vs. organic traffic, social channels) and geographic data (city, state, country) to further refine content personalization.

SKILLS

Languages: Java, Python, SQL

Web Technologies: HTML, CSS, React, Next.js, Node.js, Flask

Databases: PostgreSQL

Tools: Git, Github, Docker, n8n, Firebase, Supabase
